

# Refurbished Passenger Car and Light Truck Dual End Dynamometer

Currently there is a previously owned Passenger Car and Light Truck Dual End Dynamometer in our inventory. When refurbished this dynamometer provides excellent value, can be on site in a short time frame, and will be in like new condition. Depending on your needs, refurbishment can include modified test enclosures, altered inertia range and the addition of optional equipment to permit any number of applications from noise measurement to environmental control.

The refurbished dynamometer will be checked for proper operation and employ the state-of-the-art ProLink software package for control, data acquisition, analysis, and reporting. Within the range of the options selected, the refurbished dynamometer will operate like a new unit with a full one-year warranty on all refurbished components.

Typical specifications for the unit on hand is shown. We encourage you to contact us as soon as possible to determine how this dynamometer can be configured for your needs. We would be pleased to provide a quotation with detailed capabilities, timing, and performance specifications. Pricing and delivery are dependent on the necessary refurbishment and modifications required.

For more information, contact LINK at (734) 453-0800 or [sales@linkeng.com](mailto:sales@linkeng.com).
